

SUREN JAYATHUNGA

Software Quality Assurance Engineer | Manual, Automation & AI-Augmented Quality Engineering

+94 76 174 2458 | surendj98@gmail.com | [linkedin.com/in/suren-jayathunga-qa](https://www.linkedin.com/in/suren-jayathunga-qa)

PROFESSIONAL SUMMARY

Software Quality Assurance Engineer with hands-on experience in manual and automation testing across international projects. Technical proficiency in building scalable end-to-end automation suites using Playwright and TypeScript, validating backend architectures via API/SQL systems, and implementing smart testing strategies that significantly reduce regression cycle times. Adept in cross-functional Agile environments delivering high quality software releases for global markets and enterprise web platforms.

TECHNICAL SKILLS MATRIX

- **Core Test Automation:** Playwright, TypeScript, Page Object Model (POM), Cross-Browser Frameworks
- **AI-Augmented Testing:** Prompt Engineering for QA, AI-Assisted Script Development, Intelligent Test Case & Test Data Generation, AI output validation & evaluation, Playwright agents for automation
- **Backend & API Validation:** API Testing (Postman), SQL Verification, Database Integrity Testing, MySQL
- **QA Methodologies:** Functional, Integration, Regression, Smoke, Sanity, UI/UX, Exploratory, User Acceptance Testing (UAT)
- **Tools, Infrastructure & Version Control:** Jira, Bitbucket, GitHub, Version Control Systems, Postman, Grafana, XShell, VS Code, draw.io, GitHub Copilot, MCP server
- **Programming Languages:** JavaScript, Java, TypeScript, SQL, HTML, CSS

KEY ACHIEVEMENTS

- Engineered a scalable Playwright-TypeScript automated testing framework, reducing manual regression testing overhead by 30%.
- Successfully drafted, managed, and executed over 1,000+ comprehensive test cases over various projects.
- Integrated prompt-engineering structures into the QA lifecycle, reducing test-case design and data preparation effort by 25%.
- Introduced a new test case design technique to the QA department, reducing test-case design and test execution effort by 50%.
- Headed the international release validation for major global telecom products, achieving 100% stable production rollouts in Monaco, Ghana, and Bolivia.
- Mentored and upskilled engineering interns on modern QA best practices and day-to-day QA tasks.

PROFESSIONAL EXPERIENCE

Wavenet International (Pvt) Ltd — *Associate Software QA Engineer*

Nov 2024 - Present

- Perform end-to-end testing across telecom and web applications, covering functional, integration, regression, smoke, and user acceptance testing (UAT).

- Develop and maintain automated regression test suites using Playwright and TypeScript under the Page Object Model (POM) pattern.
- Manage branch code, commit test scripts, and collaborate on codebase updates utilizing Git and Bitbucket version control workflows.
- Perform data validation using SQL queries to ensure database state consistency.
- Analyze change request (CR) requirements, verify system enhancements, and report, track, and audit system issues using Jira.
- Deliver platform demonstrations to external project stakeholders and mentor QA interns on test execution and quality governance standards.

Wavenet International (Pvt) Ltd — Intern Software QA Engineer
May 2024 - Nov 2024

- Logged software bugs, verified developer resolutions, and maintained detailed lifecycle reports inside Jira.
- Gained hands-on familiarity with team collaboration repositories using Bitbucket and foundational Git commands.
- Supported UAT documentation compilation, participated in Agile ceremonies, and contributed to internal automation workshops.

SELECTED INDUSTRY PROJECTS

Compose Platform Revamp - Manual & Automation

- **Problem Solved:** Inefficient manual regression cycles delaying fast-paced feature rollouts.
- **Skills & Actions:** Engineered an automated testing core using Playwright, TypeScript, and Page Object Model (POM), incorporating AI-assisted generation workflows via Claude.
- **Impact:** Reduced manual regression effort by 30%, successfully validating 300+ test paths and capturing 50+ bugs prior to release.

SauceDemo QA Automation Framework – Playwright & TypeScript *GitHub:* <https://github.com/Suren-Coder/saucedemo-playwright-qa.git>

- **Problem Solved:** Replaced repetitive manual validation of critical e-commerce workflows with a maintainable automated testing solution.
- **Skills & Actions:** Engineered a Playwright + TypeScript framework using POM, reusable fixtures, centralized test data, stable locators, smoke/regression/E2E suites, cross-browser testing, leveraged Playwright MCP and Agents for AI-assisted test development.
- **Impact:** Automated critical authentication, inventory, cart, checkout, and end-to-end purchase journeys with HTML reporting and trace-based failure diagnostics.

Visual Voice Mail & RBT Systems - International Telecom (Monaco & Ghana)

- **Problem Solved:** Securing flawless validation of complex IVR networks, transcriptions, sentiment analysis, and multi-portal systems.

- **Skills & Actions:** Conducted end-to-end functional and backend data testing across Admin and Customer portals using Postman API tracking, IVR call simulations and Linux terminal diagnostics.
- **Impact:** Validated 550+ combined telecom configurations, achieving a 100% stable rollout.

USSD Postpaid Inquiry System & Security Updates - Hutch Sri Lanka

- **Problem Solved:** Validating high-volume balance inquiry loops and Client Change Requirements (CRs) like password policy enhancement.
- **Skills & Actions:** Formulated robust SQL verification scripts and utilized prompt engineering to systematically predict and simulate negative edge-case validation scenarios.
- **Impact:** Designed 65+ custom conditions, eliminating edge-case data leaks and enabling immediate, successful client UAT sign-offs.

Gemstone E-Commerce & Workplace Equality Platforms - (Australia & UK)

- **Problem Solved:** UI/UX consistency and accessibility compliance breaks across multiple devices, browser types, and localized web screens.
- **Skills & Actions:** Designed comprehensive cross-browser validation patterns and validated responsive UI and digital accessibility matrices.
- **Impact:** Executed 200+ localized test cases and documented over 40 functional/visual anomalies to secure high-stability client-ready versions.

EDUCATION & CERTIFICATIONS

Bachelor of Information Technology - University of Colombo

Professional Certifications:

- QA Manual Testing Master Programme - Developersstack
- Exploring Playwright and TypeScript Essentials CodeSignal
- Playwright: Design Patterns & Understanding Manual Testing LinkedIn Learning
- Software Testing Masterclass - Udemy
- Java Programming - Master Java Basics - Udemy
